P R E F A C E.

IT may be proper to inform the Purchasers of the Catalogue, and the Public in general, That there is no one Article contained in it but was a Part of the Genuine COLLECTION of the late Noble Possessor, *Margaret Cavendish, Duchess Dowager of Portland*. Nothing is foisted into it from the Cabinets of others; but every Subject here recorded came into her Possession, either by Inheritance, the Assistance of those who were honored with her Friendship, or by her own Purchase and Industry. And how diligent have been her Enquiries into Natural Knowledge and the Polite Arts, as well as successful her Endeavours to encrease the Stores of them, the following Catalogue will, in a great Measure, demonstrate. In the Articles of *Virtu* it contains no inconsiderable Part of her most Valuable Collection; but in *Natural History* every Subject is inserted she had with so much Pains and Treasure accumulated. And here it will appear, that all the Three Kingdoms of Nature, the *Animal*, *Vegetable*, and *Fossil*, were comprehended in her Researches. In all of these she took infinite Pleasure and Delight; but in none of them is her Cabinet more richly stored than in that durable and beautiful Part of the *First*, named *Conchology*. In this Branch of Nature's Works, no Collection in *Europe* can equal that of her Grace's in Number and Variety. To give some Idea of its great Extent, it may be remarked, that the celebrated *Linnaeus*, who had studied the Subject, and methodized the Materials of it, has not described One Fourth Part of the Objects contained in the Museum now offered to the Public. It was indeed in the Intention of the enlightened Possessor to have had every unknown Species described and published to the World; but it pleased God to cut short the Design, not only by the Death of the ingenious Naturalist employed by her for that Purpose*; but, in a short Time afterwards, to the great and irreparable Loss of Science, by her own also. Had her Life been continued a few Years longer, it is possible that every Subject in this Catalogue would have been properly described and characterized; but in the present Mazes of Science, all that could be done by the Compiler was only to give in general the classical or popular Names to such Articles as were known to have any, and to leave

* *Dr. Solander.*

the great Bulk of Non-descripts to the Examination and Determination of the Curious. Some Persons, perhaps, may object to the Promiscuous Assemblage of the various Subjects here exhibited, and be ready to wish that they had been allotted in Order and Method, according to *Genus* and *Species*; and it must be confessed, that such a Proceeding would have proved extremely satisfactory to every true Lover of Science. Such would have been highly pleased to have seen each Article named, and stand in its proper Place. But however desirable such an Attainment might have been to a few *Cognoscenti*, it is very certain that the Majority of the World are not *Methodists*. They love Variety more than Order, and would rather purchase Twenty different Species of *Cones* or *Turbos* in One Lot, than the same Number of *Highb Admirals* or *Wentletraps*. Yet to gratify every Palate, Care has been taken, as much as possible, to keep the *Grand Classes*, and often the *Genera* together; at least as far as Respect to *Size*, *Rarity*, or *Beauty*, would allow. And in this Disposition, there are very few Subjects but will occur again and again; so that almost every Person desirous of becoming a Purchaser, may have an Opportunity of supplying his Wants. Whereas, in a methodical Arrangement, it must of Necessity have frequently happened, either that a Multitude of the *same Species* must be sold together in *One Lot*, (which very few would chuse to purchase) or each Individual of that Species, must be disposed of *singly*, or in *Pairs*; which would have multiplied the Number of Lots to such a Degree as would extend the Sale to as many *Weeks*, as it consists at present of *Days*.

It is hoped however, that the *Man of Science* will not be altogether disappointed in the present Arrangement of the Catalogue; for as much Pains and Care have been taken to affix the proper classical, or generally received Names, to as many Articles as the Time and Abilities of the Compiler* would allow; it will be no great Trouble for him to cast his Eye over each Day's Sale, as it occurs, and he will hardly fail to meet in one or more of them, with the Subjects he desires. In Order therefore to his more ready Understanding the various Articles recorded in the following Catalogue, it remains only to subjoin an Explanation of the References and Abbreviations made Use of in it.

The height is 6 ½ inches, the width at bottom 5 inches, and the top 3 ¼. The inside of the lid is enamelled, with a garnet in the center*
- 4146 *A very curious gold enamelled antique cup, of extraordinary workmanship and elegant form, weight 23 oz. 2 dwts. 21 gr.*

- 4147 *A very curious Rosary, by* **BENVENUTO CELLINI**, *said to be the Rosary of* **HENRIETTA MARIA**, *Queen of King* **CHARLES I.** *who, in her necessities, pawned it to the Duke of* **ORLEANS**. *It consists of six plumb and fifty cherry-stones; the first most curiously carved with parts of history, the latter with beads of emperors; and on the reverses emblems and mottos—of which a manuscript account is annexed*
- 4148 *A most remarkable fine ditto, by* **DITTO**, *said to have been the property of Pope* **CLEMENT VII.** *consisting of thirty-two plumb-stones of exquisite workmanship of sculptures on both sides, in relievo; and between each stone is a pearl, 32 in number, with a larger one on the top of the tassel—a manuscript account is annexed*
- 4149 *A piece of carving in wood, representing landscapes, with views, in which is introduced water with vessels sailing, and on land various representations of hunting, with boar, stag, dogs, and men on horseback:—the whole executed in a manner that is beyond description, and in the highest preservation*
- 4150 *A gold box, with an exceeding curious mosaic top and bottom*
- 4151 *A small chimera of fine antique mosaic, set in gold as a ring, and turns u
swivel. The figure has the wings and feet of a bird, with a human face
seems to be an Hieroglyphic*
- 4152 *A precious fragment of an antique intaglio, in an exceeding fine carnelian, set in
for a ring. It represents* **HERCULES** *as low as the waist, sitting in a skiff,
a lion's skin for a sail, one of the paws is fastened by a string, which hangs over
head of* **HERCULES**, *whose strength in neck and back is wonderfully expressed

in the earth about the year 235 after* **CHRIST**, *and was dug up by order of* **POPE**
BARBERINI, *named* **URBAN VIII.** *between the years 1623 and 1644. The
materials of which it is composed emulate an onyx, the ground a rich transparent
dark amethystine colour, and the snowy figures which adorn it are in bas relief, of
workmanship above all encomium, and such as cannot but excite in us the highest idea
of the arts of the ancients. Its dimensions are 9 inches and 3 quarters high, and
21 Inches and 3 quarters in circumference. A more particular account of this
famous vase may be found in* **Montfaucon's Antiquities**, *vol. V. book II. chap. VI.
In* **Sig. Bartoli delle Sepulchri Antichi.** *In the* **Ædes Barberinæ.** *In* **Wright's**
Breval's, *and* **Misson's Travels.** *In* **Winckelman on the Arts of the Ancients.**
