Range Correction for *Agaronia propatula*
(Conrad, 1849)

by

Carol Skoglund
3846 E. Highland Ave.
Phoenix, Arizona 85018, U.S.A.

LOPEZ *et al.* (1988) report *Agaronia propatula* (Conrad, 1849) from Bahia de los Angeles, Baja California. The shells were actually collected by me near the type locality of *Epitonium textimatum* DuShane, 1977, at Playa de los Angeles, Tenacatita Bay, Jalisco, Mexico (see map in DUSHANE, 1977).

The correct range for the species should be from Jalisco, Mexico, to Panama.

Worldwide Chiton Collection
Available for Loan

A collection of chiton specimens, which previously formed a part of the collection of Dr. Ian McTaggart-Cowan, has been catalogued at the Royal British Columbia Museum. Many worldwide localities are represented, although most specimens come from British Columbia and the western

coast of North America. Specimens are available for loan to scientists interested in studying the systematics, distribution, or taxonomy of this molluscan group. Most specimens are fluid preserved, although some are dry dorsal plates only. The collection contains 19 paratypes from 4 locations (Peden & Green, 1981, *Syesis* 14:155-162).

Requests for further information regarding this collection should be directed to:

Grant Hughes, Chief, Biological
Collections, or

International Commission on
Zoological Nomenclature

The following Opinion of potential interest to our readers has been published by the ICZN in the *Bulletin of Zoological Nomenclature*, volume 45, part 3, on 23 September 1988:

Opinion No. 1502. *Conus fergusonii* G. B. Sowerby III, 1873 (Mollusca, Gastropoda): specific name conserved.

The following application has been published on 16 December 1988 in volume 45, part 3 of the *Bulletin of Zoological Nomenclature*. Comment or advice on this application is invited for publication in the *Bulletin* and should be sent to the Executive Secretary, ICZN, British Museum (Natural History), Cromwell Road, London SW7 5BD, U.K.

Case 2643. *Iphinoe* Bate, 1856 (Crustacea, Cumacea): proposed conservation.

Conservation of the generic name *Iphinoe* Bate, 1856, of cumacean crustaceans involves the suppression of the gastropod name *Iphinoe* H. & A. Adams, 1854.
